¹ For contracts under which the Bidder participated as a joint venture member or sub-contractor, only the Bidder’s share, by value, shall be considered to meet this requirement.

² In the case of JV, the value of contracts completed by its members shall not be aggregated to determine whether the requirement of the minimum value of a single contract has been met. Instead, each contract performed by each member shall satisfy the minimum value of a single contract as required for single entity. In determining whether the JV meets the requirement of total number of contracts, only the number of contracts completed by all members each of value equal or more than the minimum value required shall be aggregated.

³ Substantial completion shall be based on 80% or more works completed under the contract.

⁴ The similarity shall be based on the physical size, complexity, methods/technology and/or other characteristics described in Scope of Works. Summation of the values of number of small value contracts (less than the value specified under requirement) to meet the overall requirement will not be accepted.
