### COMMUNITY CONSULTATION – DISCUSSION GUIDE Dabhoi-Bodeli Corridor

#### ROADS AND BUILDINGS DEPARTMENT, GOVT. OF GUJARAT PPWCS, GUJARAT STATE HIGHWAY PROJECT-II,

##### Introduction

- Government of Gujarat has taken up the second Gujarat State Highway Project (GSHP-II), covering upgradation, maintenance and improvement of identified core road network for loan appraisal with the World Bank. Roads and Building Department (R&BD), the responsible body for managing the project, has retained M/s LEA Associates South Asia Pvt. Ltd. (LASA) as Project Preparatory Works Consultants to prepare pertinent plans on widening and upgradation of highways.
- As a pre-requisite towards loan appraisal with the World Bank, R&BD has selected ten corridors at this stage, aggregating to 459.71km length for detailed project report. This includes widening and upgradation of Dabhoi-Bodeli corridor.
- The project corridor Dabhoi-Bodeli starts from Dabhoi at km 29+700 and ends at km 68+000 near Bodeli. The total length of the proposed corridor is 38.735 km. Corridor of Impact (CoI) is 12 m for two-lane sections and 21.75 m for four-lane sections.
- Consultation intends to disseminate the information regarding the proposed development as well as to know the opinion of the people regarding resettlement issues, road safety measures and potential impacts of the project.

##### Discussion Points – General

- Awareness and opinion about the project
- Road safety issues along the corridor [road accidents/avoidance/suggestions etc – specific cases of accidents taking place in particular locations – reasons for such accidents – increase/decrease in accidents]

##### Discussion Points for Commercial / industrial Category

- Extent of impact [in terms of loss of property – loss of livelihood – any improvement in business expected due to the project, etc.]

**Minutes of Meeting**  
**Free, Prior and Informed Consultation in Scheduled Areas**

**Project Corridor: Lunawada-Khedapa**

**Date: 22nd June 2012**

**Venue: Conference Hall, Taluka Office, Santrampur**

The meeting was chaired by Taluka Development Officer, Santrampur Taluka.

**Participant Details**

Category	Number of Participants
Village community (excluding women)	26
Taluka Office	3
R&BD	1
PPWCS Consultant	3
Women	6
<b>Total</b>	<b>39</b>

**Consultation Summary**

Participants were supportive for the proposed road improvement and opined that road development will bring many benefits to the villages located alongside the road. Majority of the participants suggested removing structures encroached into the government land and the community will support those poor households who lose livelihood consequent to the road development.

The participants informed during the open discussion that project sun shine in the agriculture sector and dairy development schemes are being implemented in the region under Vanbandhu Kalyan Yojana. In a bid to improve the transport facilities, 14 mini buses are provided for the villages under the Santrampur taluka. Apart from these, drinking water facilities, free treatment for pregnant women, computer education centres etc. are being provided under VKY. Majority of the villagers depend upon agriculture for their livelihood. During off-season a huge chunk of the population migrates to urban areas in search of works. Mostly the migrant labourers get their livelihood in construction industry in nearby towns and cities

Discussion on Forest rights granted to the STs under Forest Rights Act, 2006 revealed that there are no forest dwellers with traditional forest rights and there are no recognized forest rights of the ST communities which will be affected due to the project corridor. Key issues discussed by the participants are summarised in **Table 1**.

**Table 1: Key Issues Discussed and Responses: Santrampur**

Key Issues Discussed	Responses / Integration into Project Design
The participants wanted to know the width of the proposed carriageway and impacts on road side structures	The proposed carriageway width is 7 m with hard shoulder. 4 kiosks owned by non-ST households will be affected.
The proposed improvements should be carried out within the available Government land, avoiding land acquisition	The improvements are proposed within the available RoW of 24 m. Land acquisition has been avoided in Scheduled Areas.
The unevenness of the road at certain locations should be improved. Loaded trucks stop or go in reverse at some steep locations.	Measures included in the design to reduce the vertical unevenness at identified locations.
Available forest land should be considered instead of private land, especially in the road section from Simaliya to Khedapa.	Impacts on private land have been avoided and developments are planned within RoW.
Places of religious importance like temples and mosques should be saved to the extent possible.	The project will not affect any religious structures. Chavdi mata temple and Dargah at Santrampur have been saved by way of shift in alignment.
Roadside trees should be protected as far as possible. Planting of trees should be carried out	The proposed road development will facilitate safe overtaking and crossing of vehicles and hence

alongside the road.	facilitate better modes of transport
Newly constructed private properties on encroached government lands should be removed in consultation with the local people; The leaders among participants opined that the community support will be provided to affected poor households squatting for home or business alongside the roads.	Public consultations have been conducted at various locations to disseminate information regarding the project and details of impact on structures. Provision of assistance included in the Resettlement Policy Framework of the project.
The affected persons losing properties should be duly compensated before the start of civil works.	Compensation for affected properties will be provided before the start of civil works.

**Consultation Summary**

Participants enquired in detail about the nature and type of impacts. Consultant along with R&BD representative visited the site with Road Design drawings and it was confirmed on site that the properties will not have any impact. Kadana being a dairy potential area, the proposed road development will benefit the region by way of facilitating for development of chilling plants and improved veterinary services. On-site observation and Discussion on Forest rights granted to the STs under Forest Rights Act, 2006 revealed that there are no forest dwellers with traditional forest rights and there are no recognized forest rights of the ST communities which will be affected due to the project corridor. Key issues discussed by the participants are summarised in **Table 2**.

**Table 2: Key Issues Discussed and Responses: Kadana**

<b>Key Issues Discussed</b>	<b>Responses and Integration into Project Design</b>
Details about proposed widening of the corridor and the impacts on road side properties were enquired.	The proposed treatment is of two-lane with hard shoulder. The project will not affect land or structures in Kadana, though it will affect 4 kiosks located in Scheduled Areas.
Some of the villagers had to part with their agricultural lands for the Kadana dam construction during 1971-72 and had not received any compensation. The compensation for land and structures, if affected due to the proposed improvements, should be paid to the affected persons at prevailing market rates and it should be settled within a reasonable time frame	The proposed improvement will not affect any private land. Compensation for any affected properties will be disbursed before the start of the civil works.
Since there is very less transaction of land among ST people, the transaction of lands among non-tribal people living in tribal villages should be considered while determining the market rates.	Acquisition of land has been completely avoided in Scheduled Areas. Road development will be carried out within the RoW. Entitlement provisions for affected land of ST household include cash compensation based on the latest Jantri values.
Places of religious importance like temples and mosques should be saved.	Design modification (shift in alignment and reduction in formation width) has been done in order to save structures of religious importance Chavdi-Mata temple near Lunawada and Dargha near Santrampur).

**Consultation Summary**

Community supports the proposed project and suggested expediting the construction works. Meghraj taluka comprises 129 villages, of which 70 are declared as Fifth Schedule Area. The proposed road in Meghraj taluka passes through 6 villages (Iploda, Kamroda, Jashvantpura, Vasna, Meghraj and Prathipura). Of these 6 villages, only Meghraj village is part of Scheduled Area. The tribal hamlets within Meghraj taluka are located alongside Shamlaji-Godhra corridor and are about 5 km away from the project corridor.

The Talati from the village Kasana informed that Vanbandhu Kalyan Yojana is being implemented in all the 70 ST villages under Meghraj taluka and the villages of the taluka located along the corridor are not covered under Vanbandhu Kalyan Yojana as these villages do not have any presence of STs. People belonging to ST community usually engage as agricultural labourers in the villages through which the corridor passes. Participants said that these agricultural labourers are largely from Rajasthan border villages and during lean season they migrate to other occupation. Majority of the villagers depend upon agriculture for their livelihood.

Medical Officer who participated in the Consultation observed that PHCs under Meghraj taluka do not have sufficient number of doctors to attend to the patients, and the issue will be resolved with better connectivity of Meghraj with important urban areas like Himatnagar, Dhansura, Kapadvanj etc. Key issues discussed by the participants are summarised in Table 3.

**Table 3: Key Issues Discussed and Responses: Meghraj**

Key Issues Discussed	Responses and Integration into Project Design
The participants requested to give details of the proposed improvements- proposed formation width, carriageway width, length etc.	The proposed improvement is of two lane with 7 m carriageway, 2.5 m of hard shoulder and the total length is 43.05 km.
The proposed improvements should be carried out within the available RoW, avoiding land acquisition.	24 m of RoW is available for the proposed improvement. The proposed improvements will be carried out within the existing RoW for the road section falling under Maghraj Taluka.
Places of religious importance like temples and mosques should be saved to the extent possible.	The project will not affect any religious structures.
Road side trees should be protected as far as possible.	Trees will be saved to the extent possible. If the impacts on trees are unavoidable due to poor geometry, safety concerns the same will be compensated after getting clearances from Forest Department.

<b>Key Issues Discussed</b>	<b>Responses and Integration into Project Design</b>
Transportation facilities should be improved with the road improvement.	The proposed road improvement will facilitate better transport facilities.
Road design should give priority to road safety issues, especially near Pruthvipura village. [participants explained about a major accident occurred near the location: eight people died as the tempo in which they were travelling collided head-on with a truck coming from opposite side near Pruthvipura village on Malpur-Megharaj section on 23rd May 2012].	Road safety measures like humps, cautionary signboards, curve warning signs etc. have been included in the design. The up-gradation will facilitate safe overtaking and crossing.
Compensation for affected properties should be provided at prevailing market rates and should be settled in a reasonable time frame.	Land acquisition is avoided in Scheduled Areas. Road development will be carried out within the RoW. Entitlement provisions for affected land of ST household include cash compensation based on the latest Jantri values. Compensation and assistances as per RPF will be disbursed before the initiation of civil works.
Tentative implementation schedule and notice period for removal of affected structures, if any	The proposed construction activities are likely to be initiated from November 2013 onwards.

**Consultation Summary**

Villagers from 11 villages namely Sankheda, Kherva, Salpura, Bamroli, Peetha, Suryaghoda, Bhadrali, Bhulvan, Lotiya, Golagamdi and Kanteshwar attended the meeting. Seven affected persons were present in the meeting. The participants are mostly farmers and merchants engaged in petty trades. Participating in the discussion the MLA, Sankheda gave a detailed account of the GoG's initiatives for the development of Scheduled Areas of the state of Gujarat. MLA observed that Vanbandhu KalyanYojana is successful tribal development programme which made tremendous progress in sectors of agriculture, dairy and education within a period of five years.

Speaking on the occasion the TDO, Sankheda and the Chitanish to the Project Administrator, ChotaUdepur welcomed the GoG's initiative to up-grade the Dabhoi-Bodeli corridor to state highway and appealed to the participants to extend all possible cooperation for the timely completion of the project. Chitanish announced the names of villages located along the corridor in order to make the participants aware about the project influence area as well as to ensure support from the villagers.

Key issues discussed by the participants are summarised in Table 4.

**Table 4: Key Issues Discussed and Responses: Sankheda**

Key Issues Discussed	Responses and Integration into Project Design
Participants enquired about the impact on private land and other properties due to the proposed road improvement.	There will not be any impact on private land. 3 kiosks owned by STs and 10 kiosks owned by non-STs will be affected. These structures are squatted into the government land.
Livelihood of kiosks owners (shops) will be affected and the affected persons asked about whether the project provides any assistance.	Training assistance for taking up income-generation activities will be provided for those who lose livelihood. Training cost of upto Rs.15000 shall be borne from the project.
Dividers should be provided all along the corridor.	Dividers all along the corridor are not advisable as it may cause safety hazard and restrict movement of the traffic. However provision for dividers has been included in the design for urban sections as per IRC norms.
Whether the proposed road design include any separate provisions for passenger shelters.	Provisions for sufficient numbers of passenger shelters have been included in the design. Those passenger shelters which are in good condition and which are not affected due to the proposed improvement will be retained.
Adequate space on road side should be provided near passenger shelters, as it is seen in Cities.	Suggested space near passenger shelters will be provided in the form of Bus-bays, where ever

This will ensure safety of passengers as well as ensure uninterrupted flow of traffic in main road.	required. To address the road safety issues in the project, a separate study has been conducted by the Road Safety Expert and recommendations have been incorporated in to the design.
Road side trees should be protected as far as possible.	Trees will be saved as far as possible; if impacts on any tree become unavoidable, compensatory tree plantation will be carried out in the ratio of 1:3.
Transportation facilities should be improved with the road improvement;	The proposed road improvement will facilitate better transport facilities. The proposed up-gradation will facilitate safe overtaking and crossing of vehicles. It will also facilitate smooth plying of heavy vehicles like buses and trucks. Better road condition is the pre-requisite for better communication.
Provision for parking spaces at major junctions like Vega junction, Golagamdi and Bodeli should be included in the design. Separate stands for pick up/ goods vans should be provided at major junction points to facilitate smooth loading/unloading and transportation of goods particularly agricultural produces.	Provisions for parking spaces and lay-byes at major spots where necessary have been included in the design.
Provision for lighting at junctions should be made as majority of the accidents occur at night due to lack of proper light.	Provisions for lighting at major junctions have been included in the design.
Golagamdi junction is an accident zone along the corridor. Poor line of sight for the vehicle users is identified by the participants as the major cause of accidents. Necessary measures should be taken to improve the existing condition of the junction.	The existing condition of the junction will be improved. The safety of the road users will be given due consideration while finalising the road design. Road safety measures like humps, cautionary signboards, curve warning signs etc. have been included in the design.
Whether the users of the Dabhoi-Bodeli road have to pay toll after its up-gradation to state highway.	Government has no inclination to introduce toll collection for the said corridor at this stage.
Foot paths should be provided in urban stretches of Vega and Bodeli.	Provision for foot paths included in the design.
A separate lane should be provided for two wheelers.	Provision for service lanes has been included in the design and it will serve the purpose for suggested provision.
Proper drains should be provided to avoid the problem of water logging during monsoon.	Provision for drains included in the design.
Compensation for affected structures should be provided at prevailing market rates. Compensation for affected structures should include cost of renovation, interior works, extension works, etc.	Compensation and assistance for affected properties will be provided as per RPF adopted for the project. Compensation for affected structures will be estimated based on R&BD Schedule of Rates without factoring for depreciation.
Tentative implementation schedule and notice period for removal of affected structures.	The proposed construction activities are likely to be initiated from November 2013 onwards. Advance notice of 4 months will be given to the affected persons.

## Circular: Guidelines for valuation of Government land and land having Government Interest

Selection of sale (deeds) of land, valuation date, factors affecting (value of land) and their multiplying factors are decided as follows for valuation of land.

(1) Selection of comparable sales (deeds):

(a) Only comparable sales (prices) of land within 1 to 1.5 kilometer radius of land under consideration will have to be considered.

(b) All sales (deeds) within last one year shall have to be consolidated and sent to the Town Planning and Valuation Department by concerned office of Revenue Department.

(c) Only sales (deeds) of last six months out of one year (sales) thus consolidated shall have to be considered in case of Surat, Ahmedabad, Vadodara, Rajkot, Jamnagar and Gandhinagar and their urban development areas. If last six months (price of) sales (deeds) are lower compared to previous six months, then average (value) of whole year shall have to be considered.

Last one year average (price of land) shall have to be considered for all areas other than those mentioned in (c) above.

(1.1) Increase due to time period:

Average (value) shall have to be considered directly for land under consideration. If there are less than enough number of sales (of land) have taken place within last six months or one year, details of earnest deeds (baanaakhat) or transfers in concerned area shall have to be collected and sent through concerned sub-registrar (of land). These details of earnest deed (baanaakhat) or transfers is not to be considered for valuation (of land), but only to know the fact that transactions (of land) are taking place in concerned areas. Under these circumstances valuation shall be decided based on sales of (land in) prior six months or still former period. If it is proved that transactions are taking place, annual increase of 12% shall have to be provided (in valuation) over the average (value) of sale in that period. In case there are no sales or transactions taking place, annual increase shall not be provided.

(2) Date of valuation:

Date of meeting of District level valuation (committee) shall be considered as valuation date.

(3) Factors affecting valuation:

After considering average of comparable sales (of land), increase or decrease shall have to be provided over average sale value for land under consideration, as per multiplying factor directed, considering following parameters.

(3.1) Development Plan Proposals and development of the area:

Land Values, especially in urban areas or where development plans have been prepared there are major effects of developed areas. It is noticed by the Government that sale prices shown in legally authorised documents are very less compared to actually prevailing prices in market. Considering this increase as per following multiplying factor shown in column of following table shall have to be given.

Sr. No.	Urban / Area	Percentage increase	multiplying factor
1	Surat Urban Area (Including SUDA / S.M.C.)	400%	4.0
2	Ahmedabad, Rajkot, Vadodara, Bhavnagar, Jamnagar, Junagadh, Gandhinagar Urban Area (Including UDA / ADA / Muni. Corp.)	200%	2.0
3	Revenue area of "A" and "B" class municipalities other than those mentioned in Sr. No. 1 and 2 above.	100%	1.0
4	"C" and "D" class municipalities	50%	0.5
5	All other rural area		

(3.2) Access to Road:

Increase over average price as per following multiplying factors shall have to be given as consideration for access to public road to land under consideration as per width of public road.

(a) For all cities and their urban areas:

		Increase	Multiplying factor
(a)	For (road) width up to 9.0 meters	10%	0.10
(b)	For (Road) width between 9.0 meter and 18.0 meters	25%	0.25
(c)	For (Road) width between 18.0 meter and 30.0 meters	75%	0.75
(d)	For (Road) width between 30.0 meter and 40.0 meters	100%	1.00
(e)	For (Road) width between 40.0 meter and 60.0 meters	150%	1.50
(f)	For (Road) width greater than 60.0 meters	200%	2.00
(g)	Without access to any road	0%	0.00

(b) Rural areas (for sr. no. 5 of para 3.1)

		Increase	Multiplying factor
(a)	National Highway	50%	0.50
(b)	State Highway	40%	0.40
(c)	For (Road) width equal to or greater than 18.0 meter	20%	0.20
(d)	For (Road) width less than 18.0 meter or no access to public road	0%	0.00

(3.3) For areas under Town Planning Scheme or proposed Town Planning Scheme:

Following multiplying factors under factor of Town Planning Schemes under Gujarat Town Composition and Urban Development Ordinance shall have to be considered.

For land within Town Planning Scheme area:

		Increase	Multiplying Factor
(a)	For period after intention to prepare draft town planning scheme and before TPS submitted to the Government	100%	1.00
(b)	Draft scheme approved (by Government) and roads opened (to traffic)	200%	2.00

However, in case where sale of land are from only respective developed / approved town planning schemes areas after development has taken place while valuation or in cases where process of preparation of town planning schemes have not started, no increase shall have to be given.

(3.4) Sale of Agricultural / non-agricultural (land):

Sale (deeds) of same type (purpose) of land shall be considered for purpose of valuation of land (Agricultural / non-agricultural). If in some special circumstances sale (deeds of land) of same purpose are not available, after preparing comparison statement in traditional manner 300% increase i.e. 3.00 multiplying factor will be used for sr. no 1 to 4 (in table under point 3.1) and 200% increase i.e. 2.00 multiplying factor shall have to be used while considering (sale of) agricultural (land) for valuation of non-agricultural (land). One third value of comparable sale value of non-agricultural land shall have to be considered while deciding value of agricultural land.

(3.5) Where some special project affecting land under consideration is taking shape:

If some special important project is taking shape in the city and land under valuation is benefited / affected by the same, increase as follows shall have to be given.

Stage of Project	Increase	Multiplying factor
At planning stage	25%	0.25
Implementation has started and 25% progress (is achieved)	50%	0.50
More than 50% progress	75%	0.75
100% completed	100%	1.00

(3.6) Increase for Policy or Scheme declaration by Government like enhanced F.S.I. / height or relaxation in problems related to land etc. for taking up planned development of some specified area: 50%

(3.7) Man made factors:

For land under consideration affected by manmade factors like canal, high tension electric line (more than 66 KVA), ribbon development rules, railway line, airport etc., decrease corresponding to estimated land portion left out from use and shall have to be noted point wise in remarks column of the statement.

Decrease as per above point 3.7 shall not be considered on average (value) of sales but it shall be considered after final calculations i.e. from the final calculation considering all increases (in value of land) as per all factors.

(4) Specific natural factors:

Discretionary increase or decrease may be made considering beneficial or adverse effects of specific factors (other than those mentioned above) like salt land of sea shore, mudflats land, mountainous, uneven land, barren land of desert etc. affecting land under consideration. For this purpose point wise and note shall be made giving reasons in proceedings.

(5) State level valuation committee shall have full powers to interpret effects of all above mentioned factors on land under consideration and in matters of changing / modifying (valuation) percentage.

(6) While selecting comparable sale (of land), sales permitted under 63(gh) shall be noted as guidance sales only but not (considered) in calculations.

(7) Above procedure shall be in force till Annual Statement of Rates (Jantri) published and implemented in the state on 01/04/2008 is not (revised and) re-published.

(8) This circular is issued with concurrence (of Government) on Revenue Department file no. JMN/3907/C.T./5/A, IWDMS file JMN – 392008 – 306475 – A. This circular shall have to be implemented with immediate effect and previous circular no. Research/Circular/2008/8094 dated 04/11/2008 shall be considered cancelled (rescinded).

(9) Previous valuations done by State Level Valuation Committee in vicinity of land under consideration shall have to be considered while making valuation by new procedure.

### Implementation of Jantri (Annual Statement of Rates)

Government of Gujarat  
Revenue Department  
Resolution No: STP-12209-769-11-H.1,  
Sachivalaya, Gandhinagar.  
31.3.2011.

Superintendent of Stamp Duty, Government Of Gujarat, Gandhinagar. Letter Dated 25-03-2011 Sr No:  
Stamp- Technical-41-2011/118

#### **Foreword**

1. The act of the state of Gujarat, - 1958 phase - 32 (h) is formed by the state government for effective implementation of the state's land / real Estate and property in the Market Value and the Guide line for determining the rates of Jantri are determined time to time. At present Jantri i.e. Annual Statements Of Rates ( A.S.R 2006) in in force since 1/4/2008.
2. With the implementation of A.S.R 2006 several representations from people and the Institutions were received regarding anomalies in in Jantri like areas left out for deciding rates, type of land (Class of Land) the appeals are also filed with the Gujarat High court. Looking to the changing scenario with respect to economic growth of the sate due to over progress and the growth in the area of industries and rural development it has been decided in principle to update/ upgrade Jantri rates. And also to take fluctuation in rate of the Property/ Land in to consideration so as to publish revised Jantri rates.
3. A survey was carried out in January 2009 and in July 2009 then changing land prices were observed and it was decided to get the prevailing prices. With that same view to decide rates during 31-1-2011 to 10-2-2011 survey work undertaken.
4. As per the survey conducted in July 2009, the survey method followed by the rural area measuring 1Km X 1 K.M. was divided in to 2, 61,200 parts. (Grid) and these parts were subdivided into three Sub Grid having total 7, 83,602 spited parts and the rates of Sub grid were availed. For this survey the readily available Maps from BISAG were used.
5. Current rates of the different categories of land were called for which included irrigable, Non irrigable, Nonagricultural, land with Mineral contains keeping in view, the location types of such land like General (Ordinary Location) lands adjoining to NH/SH and MDR/ODR accordingly rates were taken for such location for Agricultural, Non Agricultural residential as well as Industrial areas, and land with Mineral contains but Non Agricultural Land.
6. Same way the Urban areas in the Corporation limits were divided in to 9638 Value Zones and the Nagarpalikas' areas were divided in to 12240 Value Zones to avail the rates and this way the action was taken further. In Corporation areas rates for the land adjoining to roads with 18 meter or less width and in Nagarpalika areas land adjoin to main roads and roads connecting to main roads were considered. The survey was linked with the rates of Developed land (Open Plots)

residential Flats/ Apartments, Offices Industries etc taking in to view about different categories of land such as irrigable, Non irrigable, Nonagricultural, Industrial areas.

7. After conducting District wise and Taluka wise the Survey within stipulated time limit for different categories of land as mentioned above. The rates of Jantri were decided after careful scrutinizing the Data entries available on the basis of Village wise Sub Gird and the Valuation Zone wise for Cities as well as Nagarpalikas'. The proposal with the guideline for the implementation for the Jantri Rates has been prepared and is submitted to the Superintendent of Stamp Duty for the approval.
